6 Annual Operating Expenses - Big Creek Hatchery

Executive Summary

This report presents the findings of the independent audit of the Big Creek Hatchery - Coho program. The hatchery is located 16 miles east of Astoria and is approximately 3 miles upstream from Big Creek's confluence with the Columbia River. The hatchery is used for adult collection, egg incubation, and rearing of winter steelhead, fall chinook, coho, and sea-run cutthroat.

The audit was conducted in 1996-1997 as part of a 2-year effort that will include 67 hatcheries and satellite facilities located on the Columbia and Snake River system in Idaho, Oregon, and Washington. The hatchery operating agencies include the U.S Fish and Wildlife Service, Idaho Department of Fish and Game, Oregon Department of Fish and Wildlife, and Washington Department of Fish and Wildlife.

Background

The audit is being conducted as a requirement of the Northwest Power Planning Council (NPPC) "Strategy for Salmon" and the Columbia River Basin Fish and Wildlife Program. Under the audit, the hatcheries are evaluated against policies and related performance measures developed by the Integrated Hatchery Operations Team (IHOT). IHOT is a multi-agency group established by the NPPC to direct the development of new basinwide standards for managing and operating fish hatcheries. The Bonneville Power Administration (BPA) contracted with Montgomery Watson to act as an independent contractor for the audit.

IHOT has established five basic policies that cover: (1) hatchery coordination, (2) hatchery performance standards, (3) fish health, (4) ecological interaction, and (5) genetics. The audit focuses on all these policies, with the exception of hatchery coordination. These policies are set forth in *Policies and Procedures for Columbia Basin Anadromous Salmonid Hatcheries (IHOT 1995)*. That document is the source for the performance measures that are the basis of this audit.

The Audit Process

The audit was based on the facility management's response to a 109-page questionnaire. This audit form was completed through a five-step process in which:

- Information was obtained from headquarters.
- The hatchery manager was asked to fill out and return the audit form.
- A 1-2 day site audit visit was conducted to inspect facilities, review hatchery records, discuss audit form responses, and develop remedial action plans.
- A compliance report was developed to document the compliance status of each performance measure. This report was then shared with the hatchery manager and IHOT representative.
- This hatchery evaluation report was written to document compliance with IHOT performance measures and develop cost estimates for remedial actions when needed.

Big Creek Hatchery - Coho Results

The Big Creek facility includes 2 ponds for adult holding, 30 concrete raceways, 1 rearing pond, 2 Canadian troughs, and incubation facilities. Big Creek Hatchery began operation in 1941 as a

state-funded facility. It was refurbished in 1957 under the Mitchell Act as part of the Columbia River Fisheries Development Program - a program to enhance declining fish runs in the Columbia River Basin. The purpose of the hatchery is to produce adult salmon and cutthroat trout that will contribute to NE Pacific and Columbia River Basin commercial and sports fisheries.

The Big Creek Hatchery - Coho program was in general compliance with most of the performance measures. In the area of program objectives, the hatchery did not have a survival goal for green-egg to eyed-egg, eyed-egg to fry, fry to smolt, and smolt to adult. The audit found that the hatchery was not in compliance with adult holding facilities, water quality monitoring requirements, alarm criteria, and pathology-free water criteria, which are all facilities requirements. The hatchery was not meeting the flow criteria for incubation and the loading and density criteria for rearing. The hatchery needed to develop written incubation and rearing standards for the IHOT Operations Plan and develop a smoltification goal and monitoring plan. In the compliance area for fish health policy, the hatchery was not using foot baths in incubation and was not meeting all the sanitation protocols. The hatchery did not have a written broodstock collection plan, spawning protocols, or a Genetics Monitoring and Evaluation Program.

The specific areas in which the Big Creek Hatchery - Coho program requires remedial actions based on the IHOT performance measures are listed below. These remedial actions are listed in alphabetical order without intent of ranking or otherwise assigning priority:

- Conduct IHOT QA/QC test for feed preparation
- Develop alarm log
- Develop an additional 300 gpm of disease-free water for incubation
- Develop approved genetics M&E plan
- Develop smoltification goal and monitor

- Develop survival goal for green-egg to eyed-egg, eyed-egg to fry, and smolt to adult
- Develop written broodstock collection plan
- Develop written spawning protocols
- Develop written standards for incubation and rearing for the IHOT Operations Plan
- Follow IHOT procedures for checking other alarms weekly
- Follow IHOT protocols for not exposing feed or feed containers to light or heat
- Follow IHOT protocols for sanitation of equipment and rain gear utilized in broodstock handling or spawning prior to its use elsewhere in the hatchery
- Follow IHOT protocols for sanitation of rearing vessels after fish are removed and prior to introducing a new fish lot or stock
- Follow IHOT protocols for transportation facilities.
- Install intake alarm on Big Creek
- Install alarms on large rearing pond and adult holding ponds
- Install alarms on rearing ponds
- Install foot baths
- Monitor DO and TGP and record
- Rebuild adult holding and spawning facility
- Reduce density prior to release
- Review IHOT flow criteria for the deep trough and vertical stack incubators
- Review need for new fingerling release channel
- Review pond operation and/or reduce production to meet IHOT density and loading criteria
- Review size goal
- Run analysis for water chemistry parameters, turbidity, alkalinity, hardness, and contaminants

Non-compliance issues resulting from items beyond human control or Performance Measures not relevant to this hatchery (Type 1 in Table 3, Section 4 of this report) were not listed above.

Facility Description

Name: Big Creek Hatchery

Stock/Species: Fall Chinook (Big Creek Stock)

Fall Chinook (Big Creek/Rogue Stock)

Coho

Winter Steelhead

Sea-run Cutthroat

Operating Agency: Oregon Department of Fish and Wildlife

Funding Agency: Mitchell Act

Location: The hatchery is located 16 miles east of Astoria and is approximately 3 miles upstream from Big Creek's confluence with the Columbia River.

Address: Route 4, Box 594

Astoria, OR 97103

Hatchery Manager: Mr. David Rieben

Phone: (503) 458-6512

Fax: (503) 458-6529

Purpose: Big Creek Hatchery began operation in 1941 as a state-funded facility. It was refurbished in 1957 under the Mitchell Act as part of the Columbia River Fisheries Development Program - a program to enhance declining fish runs in the Columbia River Basin. The purpose of the hatchery is to produce adult salmon and cutthroat trout that will contribute to NE Pacific and Columbia River Basin commercial and

sports fisheries.

Production Goal:

Fall Chinook (Big Creek Stock)

Produce 5,700,000 smolts (71,250 lb) and 5,200,000 fingerlings (38,670 lb) for on-station release.

Provide 6,810,000 eggs for ODFW programs.

Fall Chinook (Big Creek/Rogue Stock)

Produce 1,000,000 smolts (67,778 lb) for on-station release.

Coho

Produce 535,000 smolts (48,636 lb) for on-station release.

Produce 60,000 smolts (4,000 lb) for release into the Tualatin River.

Winter Steelhead

Produce 60,000 smolts (12,000 lb) for on-station release.

Produce 63,000 smolts (6,300 lb) for transfer to Klaskanine Hatchery.

Provide 557,300 eggs for ODFW programs.

Sea-run Cutthroat

Produce smolts when adults are available.

Water Supply:

There are four water sources for the hatchery: Big Creek, Mill Creek, and two springs. Current water rights total 36,158 gpm plus an additional 4.2 cfs reservoir water right.

Facilities:

Adult Holding:	2 concrete adult holding ponds, 6,513 and 15,880 cf
Incubation:	4 16-tray vertical incubators
	48 shallow troughs - 13 cf each
	16 shallow troughs - 26 cf each
Early Rearing:	2 Canadian troughs - 108 cf
Raceways:	9 concrete raceways - 4400 cf each
	21 concrete raceways - 4400 cf each
Rearing Ponds:	1 concrete rearing pond - 12,112 cf
Satellite Facilities:	None

Compliance Status

The hatchery audits are based on compliance with written IHOT performance measures. These performance measures are documented in *Policies and Procedures for Columbia Basin Anadromous Salmonid Hatcheries* (referred to as *IHOT 1995* in this report).

The purpose of the performance measures is to implement new basinwide policies that provide regional guidelines for operating anadromous hatcheries in the Columbia Basin.

The audit focuses on performance measures for IHOT policies that cover (1) hatchery performance standards, (2) fish health, (3) ecological interaction, and (4) genetics. These performance measures are intended to guide hatchery operations once production is established. For that reason, the hatchery operations audit included broodstock collection, spawning, incubation of eggs, fish rearing and feeding, fish release, equipment maintenance and operations, and personnel training. Production priorities are beyond the scope of this audit.

Based on *IHOT 1995*, a detailed 109-page audit form was developed. The audit form divided the performance measures into six major sections along major program and technical criteria areas. Two additional sections (sections 1 and 8) include general information and expenditure information needed for this Hatchery Evaluation Report and blank forms for additional comments. The following is the basic structure of the IHOT audit form:

Section 1 Performance Measures for General Information and Expenditure
Information (PMs General 1-2)

Integrated Hatchery Operations Team (IHOT) 1995. *Policies and Procedures for Columbia Basin Anadromous Salmonid Hatcheries*, Bonneville Power Administration, Portland, Oregon.

Section 2	Performance Measures for Program Objectives (PMs 1-4)
Section 3	Performance Measures for Facility Requirements (PMs 5-15)
Section 4	Performance Measures for Hatchery Practices (PMs 16-25)
Section 5	Performance Measures for Fish Health Policy (PMs 26-34)
Section 6	Performance Measures for Ecological Interactions (PMs 35-38)
Section 7	Performance Measures for Genetics Policy (PMs 39-43)
Section 8	Blank Forms for Additional Comments.

Several performance measures are repeated in various sections of the audit form. These performance measures overlap in *IHOT 1995* and were retained to allow individuals interested in specific portions of the audit (such as Genetics or Fish Health) to determine the compliance status of all performance measures for a given topic in one location. A repeated performance measure is indicated by shaded text.

The Hatchery Audit Process

The hatchery audit will be conducted over a 2-year period that concludes in 1997. At each hatchery, a five-step process was used to complete the overall hatchery audit.

This process consisted of research and onsite visits. The site visit at the Big Creek Hatchery was conducted on March 18, 1997.

The following is the five-step audit process:

1. Information was obtained from headquarters.
2. The hatchery manager was asked to fill out and return the **Audit Form**.

3. A 1-2 day site audit visit was conducted at each hatchery. During that visit an audit team inspected facilities, reviewed hatchery records, discussed audit form responses, and developed remedial action plans when appropriate.
4. During the site visit, the compliance status of each performance measure was discussed with the hatchery manager and IHOT representative. A portion of the Hatchery Evaluation Report was sent to the hatchery manager following the audit visit as a **Compliance Report**. That Compliance Report is Table 2 of this report.
5. Information from steps 1-4 was used to prepare a draft **Hatchery Evaluation Report**. This draft report was submitted to the operating agencies for review of the information used to determine compliance. Based on review and comments, a final Hatchery Evaluation Report was developed. The final report documents the compliance of a particular hatchery with the IHOT performance measures and presents cost estimates to correct any deficiencies.

Compliance Status of Big Creek Hatchery - Coho

The following table includes information on life-stages that are held on this facility for some portion of their rearing cycle (Table 1). For multi-facility programs, summary cost and contribution data is presented at the facility where rearing occurs. For the compliance status relating to performance measures that do not occur at this hatchery, please refer to the Hatchery Evaluation Reports for the hatcheries and stocks listed in Table 1. A check mark (4) indicates that the specific life-stage is held at this facility.

This section documents the compliance status of the Big Creek Hatchery - Coho program. Each performance measure is presented in a table taken from the audit form (Table 2). The compliance status is identified by the following categories:

- **N/A** (not applicable)
- **Yes** (in compliance)
- **?** (unknown; generally due to unavailability of information to determine compliance)
- **No** (not in compliance).

Remedial actions are suggested for performance measures not in compliance. These remedial actions are grouped into categories and listed in Section 4 of this report, where the cost of the required remedial actions is also presented.

Table 1 Summary Program Information for Big Creek Hatchery - Coho

Component	Location of Adult Holding, Spawning, Incubation, and Rearing					
	Big Creek Hatchery					
Adult Collection	4					
Adult Holding	4					
Spawning	4					
Fertilization	4					
Incubation						
green-to-eyed	4					
eyed-to-hatch	4					
Rearing						
fry	4					
fingerlings	4					
smolts	4					
Acclimation/release	4					

Table 2 Big Creek Hatchery - Coho Compliance With Performance Measures

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#1	Are the hatchery programs outlined in a subbasin management plan?		4			Columbia Basin System Planning Production Plan	
#2	Is the hatchery operating under a current hatchery operational plan? Is it understood by staff? Is it being followed?		4 4 4			IHOT Operations Plan	
#3	Is a hatchery monitoring and evaluation plan in place? Do you have a written monitoring and evaluation plan?		4			CWT and Missing Production Reports	
#4a	Adult contribution to fisheries, spawning grounds, and hatchery		4			Review of records	
#4b	Adult pre-spawning survival as compared with established goal				4	Review of records; in compliance 2 out of last 4 years	Rebuild spawning facility
#4c	Egg-take as compared with established hatchery goal		4			Review of records; in compliance 3 out of last 3 years

		N/A	Yes	?	No		
#10	Screening facilities						
	Do you meet the approach velocity criteria?		4			Inspection of facilities/Discussion	
	Are the fish screens regularly cleaned?		4			Inspection of facilities/Discussion	
	Does the screen mesh meet screen opening criteria?		4			Inspection of facilities/Discussion	
	Are rearing containers double screened for fish that should not be released to adjacent water?	4				Released on station	
#11	Predator control facilities						
	Are your predation control facilities effective?		4			Inspection of facilities/Discussion	

Table 2 Big Creek Hatchery - Coho Compliance With Performance Measures

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#12	Food storage facilities and quality control						
	Does the storage of dry/semi-moist/moist foods (dry<12%; semi-moist 12-20%; moist >20% moisture) follow food manufacturer's recommendations?		4			Inspection of facilities/Discussion	
	Does a regional quality control officer oversee production procedures and monitor:						
	Verification by feed manufacturer that ingredients meet specifications?				4	Discussion	Conduct IHOT QA/QC tests for feed preparation
	Ensure feed does not contain unwanted drugs or other additives?				4	Discussion	See above
	Analyze ingredients contained in the final food product to ensure that feed specifications have been met?				4	Discussion	See above
	Are the foods stored and handled according to the following criteria?						

Table 2 Big Creek Hatchery - Coho Compliance With Performance Measures

		N/A	Yes	?	No		
	Moist pellets should not exceed 10°F at point of delivery.		4			Discussion	
	Moist pellets should be removed from freezer just prior to feeding.		4			Discussion	
	Do not leave buckets of feed or feed containers outside exposed to light or heat.				4	Discussion	Follow IHOT protocols for not exposing feed or feed containers to light or heat
	Open bags of feed should be fed within 1 to 2 days except when feeding small groups of fish.		4			Discussion	
	Automatic feeder hoppers and bulk storage facilities should be insulated against excessive temperatures (80°F and above).	4				No automatic feeders	

Table 2 Big Creek Hatchery - Coho Compliance With Performance Measures

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#13	Release facilities Do the release facilities ensure that fish are not subjected to adverse conditions?			4		Inspection of facilities/Discussion	Review need for new fingerling release channel
#14	Pollution abatement facilities Do the pollution abatement facilities meet all federal and state regulations (or good engineering practice)? Are pollution abatement facilities operated correctly?		4 4			Inspection of facilities/Discussion Discussion	
#15	Transportation facilities Are the transport systems adequate to meet IHOT performance measures for transportation practices?		4			Discussion. 60,000 smolts trucked to Tualatin River for release.

		N/A	Yes	?	No		
#23	Transportation facilities						
	Do transportation equipment and personnel receive disinfection before and after use?		4			Discussion. Smolts trucked to Tualatin River.	
	Is the fish tank interior disinfected using a solution of 200 ppm active chlorine for 30 minutes minimum or formaldehyde gas generation method (relative humidity of 60% for 2 hrs)?		4			Discussion.	
	Is the exterior of the fish transport vehicle disinfected using high pressure steam (115-130°C), high temperature acid, or with 200 ppm chlorine for 30 minutes?				4	Discussion.	Follow IHOT protocols for disinfection of vehicle interior and exterior.
	Is the fish transport vehicle (cab) disinfected using 600 ppm quaternary ammonia compounds (1.5 ml of 50% stock solution/liter water)?				4	Discussion.	See above
	Is other equipment disinfected including fish pumps, nets, egg sorters, waders, boots, rain gear, hoses and other equipment using one of the following solutions?		4			Discussion.	

Table 2 Big Creek Hatchery - Coho Compliance With Performance Measures

		N/A	Yes	?	No		
	200 ppm chlorine for 30 minutes 600 ppm quaternary ammonia compound for 30 minutes 200 ppm iodophor solution for 10 minutes						
	Do personnel wear protective garments when handling fish eggs or cultural water?				4		See above
	Do the fish transport truck/chassis and tank/unit receive an inspection and service prior to the release season?		4			Discussion.	
	Is a daily service inspection completed before starting up and leaving for the day?		4			Discussion.	

Table 2 Big Creek Hatchery - Coho Compliance With Performance Measures

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#23 (cont)	Transportation facilities						
	Does the fish transport unit receive an inspection prior to loading?		4			Discussion. Smolts trucked to Tualatin River.	
	Does a pre-loading inspection covering tank water level, pumps or aerators, oxygen injection system settings, displacement gauge, and truck loading/hauling density tables checked and reviewed occur prior to loading fish in the transport unit?		4			Discussion	
	Do hauling criteria include checking the fish 45 minutes to 1 hour after loading?		4			Discussion	
	When fish are active and systems are functioning properly, is the oxygen concentration reduced and maintained at approximately 8 ppm?		4			Discussion	
	Is water temperature in the transportation unit maintained within the 42-48 °F range?				4	Discussion	Follow IHOT temperature criteria for transport.

Table 2 Big Creek Hatchery - Coho Compliance With Performance Measures

		N/A	Yes	?	No		
	Do fish releasing procedures include the following criteria?					Discussion	
	Releasing the fish at the correct release site or into the correct water body.		4			Discussion	
	Tempering or the difference between the liberation tank and the target water body should not exceed 10°F.		4			Discussion	
	The liberation hose should be angled so that fish gently hit the water. Using a tripod is a method of ensuring the hose will stay at the proper angle.		4			Discussion	

Table 2 Big Creek Hatchery - Coho Compliance With Performance Measures

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#24	Evaluation practices						
	Has the hatchery conducted fishery contribution studies to:						
	Determine the requirements for evaluating and improving management programs?		4			Discussion	
	Develop guidelines that define the geographical area and identify component stocks (hatchery and/or wild) that comprise the management unit?		4			Discussion	
	Develop guidelines that define if the proper stocks of fish are currently being used?		4			Discussion	
	Determine which management units contribute to a specific fishery and the time periods of those contributions?		4			Discussion	
	Determine the relative contributions of the various management units to a specific fishery over the different time periods?		4			Discussion

		N/A	Yes	?	No		
#42	Was the appropriate number of spawners, male/female ratios, and fertilization protocols used?						
#42a	Are the spawning protocols written?				4	None provided	Develop written spawning protocols
#42b	Are daily or weekly spawning logs available?		4			Review of records	
#42c	Was the appropriate number of spawners used?		4			Discussion/Review of records	
#42d	Did you attempt to spawn all collected broodstock and randomize mating with respect to age class, and other traits?		4			Discussion	
#42e	Was the sex-ratio within the limits given in the performance standards?		4			Discussion	
#42f	Were the fertilization protocols followed?		4			Discussion/Review of records	
#42g	If the hatchery needed to reduce the number of eggs retained, was this done by representative sampling of each male/female cross?		4			Discussion	

Table 2 Big Creek Hatchery - Coho Compliance With Performance Measures

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#43	Is there a genetics monitoring and evaluation program in place?						
	Is a genetics monitoring and evaluation program available?				4	None provided	Develop approved genetics M&E plan
	Does the plan address the following elements listed in IHOT:						
	Does the program have elements needed to meet evaluation goals 1-4?				4	Discussion	See above
	Has a qualified geneticist reviewed and endorsed the program (goal 5)?				4	Discussion	See above
	Will the program collect the data and maintain the records needed to evaluate compliance on an ongoing basis (goal 5)?				4	Discussion	See above
	Is the program understood and followed by staff?				4	Discussion	See above

Remedial Actions

Based on the compliance status for each performance measure, remedial actions were developed. The required remedial actions are organized into five categories. The types of categories range across a spectrum from those actions that are beyond human control, to those that require a change in agency policy or procedures, to those that involve a significant capital cost to put in place. The following are the five types of remedial actions identified under phase 1 of the audit:

The Five Types of Remedial Actions

Type	Description
1	Non-compliance issues resulting from items beyond human control or Performance Measures not relevant for this hatchery
2	Remedial actions requiring changes in agency policies or procedures
3	Remedial actions requiring changes in monitoring coverage or interval
4	Remedial actions requiring significant capital expenditures
5	Remedial actions that may require significant capital expenditures but are not clearly definable at this time

Remedial Actions at Big Creek Hatchery - Coho

This section presents the corrective actions required to bring the Big Creek Hatchery - Coho program into compliance with IHOT performance measures. The remedial actions suggested here are just that, suggestions developed by the Montgomery Watson Audit Team. For some non-compliance areas, other remedial actions could be proposed. The required remedial actions are cross-referenced to each IHOT performance measure that was not in compliance. Where appropriate, the costs associated with the remedial actions are also presented (Table 3).

The cost estimates presented in this section are based on professional experience from similar projects. In most cases, only a lump-sum figure is presented, and detailed take-off lists have not been prepared. The cost estimates are essentially order of magnitude estimates ($\pm 40\%$).

More importantly, the suggested remedial activities may also present several levels of action. Optional actions have been listed for several problems. These optional actions are desirable for either operational or safety considerations.

Table 3. Remedial Actions Required at Big Creek Hatchery - Coho

Remedial Action Required	Cost	PMS ¹
Type 1 - Non-compliance issues resulting from items beyond human control or Performance Measures not relevant for this hatchery		
Install security alarms	----	6
Type 2 - Remedial actions requiring changes in agency policies or procedures		
Develop survival goal for green-egg to eyed-egg, eyed-egg to fry, and smolt to adult	----	4d, 4e, 4h
Follow IHOT procedures for checking other alarms weekly	----	6
Develop alarm log	----	6
Conduct IHOT QA/QC test for feed preparation	----	12
Follow IHOT protocols for not exposing feed or feed containers to light or heat	----	12
Develop written standards for incubation and rearing for the IHOT Operations Plan	----	18-19
Review IHOT flow criteria for the deep trough and vertical stack incubators	----	18
Review pond operation and/or reduce production to meet IHOT density and loading criteria	----	19
Develop smoltification goal and monitor	----	22a1
Reduce density prior to release	----	22a2
Review size goal	----	22a5
Follow IHOT protocols for transportation facilities	----	23
Install foot baths	----	28
Follow IHOT protocols for sanitation of equipment and rain gear utilized in broodstock handling or spawning prior to its use elsewhere in the hatchery	----	28

Remedial Action Required	Cost	PMS ²
Type 2 (cont)	----	28
Follow IHOT protocols for sanitation of rearing vessels after fish are removed and prior to introducing a new fish lot or stock		
Develop written broodstock collection plan	----	41
Develop written spawning protocols	----	42
Develop approved genetics M&E plan	----	43
Type 3 - Remedial actions requiring changes in monitoring coverage or interval		
Monitor DO and TGP and record	----	5b
Run analysis for water chemistry parameters, turbidity, alkalinity, hardness, and contaminants	----	5c-5g
Type 4 - Remedial actions requiring significant capital expenditures		
Rebuild adult holding and spawning facility	\$2.0 million	4b,7
Install intake alarm on Big Creek	\$10,000	6
Install alarms on large rearing pond and adult holding ponds	\$20,000	6
Install alarms on rearing ponds	\$10,000	6
Type 5 - Remedial actions that may require significant capital expenditures but are not clearly definable at this time		
Develop an additional 300 gpm of disease-free water for incubation	----	5h, 28
Review need for new fingerling release channel	----	13

Hatchery Contribution to Fisheries, Spawning Grounds, and Hatcheries

This section presents the audit findings for the Big Creek Hatchery - Coho program contribution of adult fish to fisheries, local fisheries, spawning grounds, and hatcheries. Data is reported by broodyear. A broodyear refers to the adult contribution from the eggs produced from a single group of spawning adults. For some species, this may include fish caught as 2-, 3-, 4-, 5-, and 6-year old fish. Because of the return distribution and data processing delays, the complete adult contribution for a given broodyear may not be available until 4 to 5 years after the fish have been released from the hatchery.

**Table 4. Adult Contribution to Fisheries, Spawning Grounds, and Hatcheries:
Big Creek Hatchery - Coho**

Year	Fisheries	Spawning Grounds¹	Hatchery¹	Total Combined Contribution	Smolt to Adult Survival (percent)
	(Broodyear)	(Broodyear)	(Broodyear)	(Broodyear)	
1981					
1982					

Data obtained from Missing Production Groups Annual Report or from the Regional Mark Information System database.

Total combined adult contribution; presented when it is not possible to subdivide the contribution into fisheries, spawning grounds, and hatchery contributions.

1983					
1984					
1985					
1986					
1987				14,183	2.42
1988				26,773	4.22
1989				18,091	2.85
1990				1,163	0.21
1991				5,234	0.80
1992					

Annual Operating Expenditures

The level and detail of annual operating expenditures varies widely depending on hatchery, operating agency, and funding source. When provided, expenditures were presented in terms of personnel costs, operating costs (power, feed, supplies), capital costs, indirect costs charged to the federal government, third-party costs, and other costs. These cost components were summed to determine a total hatchery annual cost. Based on discussion with the hatchery manager, the percent of total hatchery costs allocated to a given program was estimated. The total hatchery costs and the percent of hatchery costs allocated to a given program were used to compute the cost of a given program. Table 5 shows the annual operating expenses for the Big Creek Hatchery - Coho program. For programs that occur at more than one facility (as shown on Table 1 in Section 3 of this report), the cost breakdown for the component(s) at each facility is presented in separate tables (Table 5a).

Table 5. Annual Operating Expenses: Big Creek Hatchery - Coho

Hatchery	1994	1995	1996
1. Big Creek	\$140,688	\$131,696	\$157,331
2.			
3.			
4.			
5.			
Total Program Costs	\$140,688	\$131,696	\$157,331

The total expenditures for the Big Creek Hatchery are presented in Table 6 by program. The detailed breakdown of program expenditures at this hatchery are presented in separate tables (Tables 6a, 6b, 6c, 6d, and 6e).

Table 6. Annual Operating Expenses - Big Creek Hatchery

Program	1994	1995	1996
1. Fall Chinook (Big Creek)	\$362,121	\$284,449	\$229,385
2. Fall Chinook (Big Creek/Rogue River	\$210,277	\$136,115	\$214,984
3. Coho	\$140,688	\$131,696	\$157,331
